

## Model 45PN Air Operated Foil Imprinting System

The Model 45PN has the same 1 1/2" x 5" imprint area as the Model 45. The air-operated machine allows for higher volume imprinting. No handle to pull; just hook up an air compressor, press the foot switch, and the air pressure does the work. With an air-operated machine both hands are free to feed the products into the machine. It also offers more consistent printing since each and every imprint is made with the same amount of pressure and dwell time. If you are printing large volumes of wedding favor ribbons this is your best choice.

Air Compressor Not Included.

Please note: This item requires the use of an air compressor (NOT INCLUDED).

### Features
