

## Intelli-Fold DE-172AF Paper Folder

If you're a fan of the Intelli-Fold or Dynafold DE-202AF, you're going to love the upgraded DE-172AF. This paper folding machine takes what you love most in the DE-202AF and adds a few additional features. Added features include a powered exit conveyor tray with stacker wheel and feed tray sensors that let you know everything is set up correctly. This paper folding machine is perfect for folding small or large sheets of paper.

The DE-172AF is perfect for tabletop or desktop paper folding needs. It conveniently has both folding plates stored on the same side for easy setup and the feed tray and exit tray are also positioned on the same side of the machine. The DE-172AF can be used to fold paper as small as 3.5" x 5" up to a larger 11" x 17". This machine is commonly used for folding brochures, letters, fliers and even restaurant menus.

Setting this machine up is easy. Simply look at the folding chart, find the paper size you are using and adjust the two folding plates accordingly. Folds are clearly marked on the plates and setup generally takes just a few minutes at most. The large feed tray on this machine holds up to 500 sheets of paper and the motor runs at a fast 6,000 sheets of paper per hour. You can use the DE-172AF to create popular folds such as the half fold, accordion fold, letter fold, double parallel fold, gate fold and much more. Because of the versatility of the folding plates, custom folds are also easy to create.

This is an excellent machine to use in a school, church or business. It is affordably priced and will save your organization hours in time over manually folding material. Take advantage of this great low price and order yours today!
